Sabang, West Midnapore, West Bengal, India, 721467

Career Objective:

I am an aspiring software developer pursuing a Bachelor's degree in computer science, with keen interest in machine learning and real-world problem solving. I have experience with advanced ML tools and programming languages including Python and C++. I am eager to learn emerging technologies to support continuous learning and professional growth.

Education:

B. Tech, Computer Science and Engineering (Ai & ML)

BRAINWARE UNIVERSITY

CGPA – 8.63

Higher Secondary Examination

Malpar Vivekananda Sikshaniketan, (WBCHSE)

Marks - 94%

Secondary Examination

Chandkuri Union High School, (WBBSE)

Marks - 85%

Certifications:

- Industrial Training in Machine Learning from Intel Unnati – 31st Jul to 13th Aug 2025
- Problem_solving_basic_certificate from Hacker Rank – 12th Aug 2025

Hobby & Interest:

Deep Learning

CNN, Image Tasks, Model Optimization

Interest in Science & Technology, listening to music, and exploring Hindu Mythology as well as Language and Culture of different places.

Skills:

Python **C++** **Machine Learning** **NLP** **Deep Learning** **TensorFlow** **Matplotlib** **Seaborn** **Pandas** **NumPy** **MySQL** **GitHub** **FastAPI** **CrewAI**

Projects:

- **Agentic Based Landing Page Generation**

Description: Developed an **Agentic-Based Landing Page Generation System** using the CrewAI framework. Architected collaborative AI agents for research, copywriting, SEO structuring, and UI composition, producing responsive, conversion-focused frontend landing pages with minimal manual intervention.
Tools: *mistral:7b-instruct-q4_0*

gemini-2.5-flash - frontend optimization.

- **Vendor News Analytics | Link**

Description: Developed a vendor news analytics platform with the help of NLP, LLM, Generative AI and Machine Learning to automate the extraction, summarization and sentiment analysis of business events from online news articles and vendor report generation with 'gpt-4o-mini'.

Tools: Sentiment analysis: 'distilbert-base-uncased-finetuned-sst-2-english'

Business report: 'gpt-4o-mini'

- **Cat vs Dog image classification | Link**

Description: CNN based classifier model, identifies image of dog vs cat from user given image as input.

Tools & Libraries: TensorFlow – keras, matplotlib, pandas, streamlit
